3. The following is an examiner's statement of reasons for allowance: The closest art Wang et al. (US 6,177,239) teaches an ink jet recording medium comprising a support, at least one imaging layer on one side of the support and a lubricant layer (equivalent to the claimed ink repelling layer) on the other side of the support as a backing layer. The lubricant layer contains composite wax particles having a wax phase composed of a natural wax a hydrophobic polymer phase, i.e., the wax is chemically or physically bonded with the polymer. Wang neither teaches nor suggests a lubricant layer having a hydrophobic binder blended with a natural wax. Wang also fails to teach or suggest a lubricant layer having an average surface roughness as recited in claim 1. Furthermore, the criticality of the claimed surface roughness has been shown in the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
